

ACMS REPORTS

ACMS reports are available for the reporting information either summary or detail level of data. The available reports provided within ACMS are of the following categories. More reports will be added on a later date.

- Agreements
- Status of Funds
- Employees
- Performance
- Spending
- Forecasting Module

The following section lists each of the report categories and provides the following for each category.

- Overview of Report Category – What the report category purpose is.
- Target Users – Identified users of the report
- Filters – The default filters that will be presented to the user when entering the Hyperion BQY document.
- Report Filters – These are the default filters that are presented to the user when entering the initial Report.

ACMS AGREEMENTS

This gives you an entire vision of all APHIS's agreements and grants.

The ACMS Agreements reports provide a means to report and categorize the Agreement reports within ACMS. These reports were available in the Agreement Tracking System managed by the Financial Management Division (FMD) Agreements Team.

Target Users

Users for the agreements sections will be generally the FMD agreements team, managers and users within ACMS.

Report Limits

The following definitions are the default limits that will be presented via the Reports when entering agreements.
